Learning Where You Live

Most are open to you, regardless of where you live. Register for them just as you would for any other courses.

- mostly one- and two-credit, pass/fail courses
- taught close to home on North and West Campuses by faculty involved in these residential communities
- a great way to meet other students

Want to explore an interesting subject in an informal and convenient setting?
Want to get to know a fantastic, friendly professor?
Still looking for an extra credit or two?

DURING ORIENTATION
Maximize your time on campus. Choose from some North Campus Learning Where You Live courses and meet some of the faculty on Sunday, August 21, Noon-1:00pm The Tatkon Center, Room 3330
Lunch provided!
**Intro to Nature Writing**

*This course is worth 1 credit and requires students to take a class every week.*

In this course, you will learn the craft of nature writing and how to use the landscape as a canvas to explore your ideas. Each week, we will write together and receive feedback on your work. This course is designed to help you find your voice and develop your skills as a nature writer. Limited to 15 students.

**Fascinating Figures**

*This course is worth 1 credit and requires students to attend every class.*

In this course, we will explore the lives of fascinating figures throughout history, from scientists and artists to philosophers and activists. We will read their work, analyze their ideas, and discuss their contributions to society. Limited to 20 students.

**Confinement**

*This course is worth 1 credit and requires students to participate in class and complete assignments.*

In this course, we will explore the experiences of prisoners in different historical and cultural contexts. We will discuss the causes of confinement, the effects on individuals and society, and the ways in which prisoners resist and challenge their conditions. Limited to 10 students.

**Building Autopsy**

*This course is worth 1 credit and requires students to participate in class and complete assignments.*

In this course, we will investigate the inner workings of buildings and how they are affected by their physical and social environments. We will use a variety of methods, including interviews, surveys, and case studies, to analyze the impact of design on human behavior. Limited to 15 students.

**This Week in Pop Music**

*This course is worth 1 credit and requires students to attend every class.*

In this course, we will explore the latest trends and developments in popular music, from rock and roll to hip hop and electronic dance music. We will listen to a variety of artists, analyze their styles and influences, and discuss the cultural significance of their work. Limited to 25 students.

**Hidden Voices in Science**

*This course is worth 1 credit and requires students to attend every class.*

In this course, we will explore the lives and contributions of scientists who were marginalized or excluded from mainstream science. We will learn about their groundbreaking discoveries, their struggles against prejudice, and their impact on society. Limited to 10 students.

**Seeing Science in Action**

*This course is worth 1 credit and requires students to attend every class.*

In this course, we will visit scientific laboratories and research facilities to witness firsthand the latest advances in science. We will learn about the processes and techniques used by scientists and discuss the implications of their work for our future. Limited to 15 students.
